

PROJECT DESCRIPTION

BEO PORT

Project acronym:	Beo Port – Pre-Feasibility Study and Conceptual Design of the new mechanised Cargo Port in Belgrade
Project objectives:	This Pre-Feasibility Study is intended to serve as the basis for the development of a new cargo port in Belgrade. The existing port in the city centre has reached his limits in terms of transport connection and room for expansion. The construction of a new international port in Belgrade has been envisaged in the city's development plans and should be completed by 2021.
Programme:	The contracting authority is „Belgrade Land Development Public Agency“.
Partners:	Tina Vienna (Vienna) and Ehting (Belgrade)
Project volume:	EUR 730,000,- (Overall project)
Duration:	August 2007 – May 2008
Project survey:	A - Pre-Feasibility Study (Determining the technical, economic, spatial, social and financial feasibility of the designed port) B – Conceptual Design (of the new port)
Role of via donau:	via donau is contributing to several work packages of the study, e.g. assessment of transport potentials especially in container business.
Contact:	Mag. Gerhard Gussmagg Tel: +43 (0) 504 321 1617 gerhard.gussmagg@via-donau.org
